

EMC-Power Line Filters for 1-Phase Systems

FPP Series, industrial-mains-filters to Protection Class I, conform to EN 133200, UL 1283 and IEC 60950

Nominal current: 0.5 – 6.5 A @ 40 °C
 Rated voltage U_R (U_{max}): 125/250 VAC 50/60 Hz
 Attenuation: Standard
 Leakage current: for Standard and Medical applications
 Test voltages: L/N → E 2.7 kVDC, 2 sec
 L → N 1.7 kVDC, 2 sec *
 Climatic category: 25/085/21 acc. to IEC 60068-1
 50% saturation typ.: 2 to 3 x I_N @ 20 °C
 Inrush current: 1.5 x I_N 1 min. per hour
 MTBF @ 40 °C / U_R (U_{max}): > 200'000 h acc. To MIL-HB-217 F
 Plastic case: UL 94 V-0
 Potting compound: UL 94 V-0

* without resistor

Approvals:

A large program of various filter types with regard to nominal voltage, rated current, number of phases and type of connection is available. They are all in accordance with the international standards of the radio interference filters like e.g. EN 133200.

The simple construction of the plastic filters with solder pins for PCB mounting is mainly suitable for later installation in the case of interference.

Interference suppression filter in plastic housing are low-priced suppressors, active over a large frequency range.

Provided that the right type of filter is selected, a double-faced effect can be achieved, namely from the apparatus outwards as noise suppression filter and in the other direction as power-transient-protective-filter.

Optional versions:

- Versions with quick connect terminal or added wire connections
- Medical version M80 with leakage current < 80 μ A
