To our customers,

Old Company Name in Catalogs and Other Documents

On April 1st, 2010, NEC Electronics Corporation merged with Renesas Technology Corporation, and Renesas Electronics Corporation took over all the business of both companies. Therefore, although the old company name remains in this document, it is a valid Renesas Electronics document. We appreciate your understanding.

Renesas Electronics website: http://www.renesas.com

Renesas Electronics Corporation

Issued by: Renesas Electronics Corporation (http://www.renesas.com)

Send any inquiries to http://www.renesas.com/inquiry.

Notice

1. All information included in this document is current as of the date this document is issued. Such information, however, is subject to change without any prior notice. Before purchasing or using any Renesas Electronics products listed herein, please confirm the latest product information with a Renesas Electronics sales office. Also, please pay regular and careful attention to additional and different information to be disclosed by Renesas Electronics such as that disclosed through our website.
2. Renesas Electronics does not assume any liability for infringement of patents, copyrights, or other intellectual property rights of third parties by or arising from the use of Renesas Electronics products or technical information described in this document. No license, express, implied or otherwise, is granted hereby under any patents, copyrights or other intellectual property rights of Renesas Electronics or others.
3. You should not alter, modify, copy, or otherwise misappropriate any Renesas Electronics product, whether in whole or in part.
4. Descriptions of circuits, software and other related information in this document are provided only to illustrate the operation of semiconductor products and application examples. You are fully responsible for the incorporation of these circuits, software, and information in the design of your equipment. Renesas Electronics assumes no responsibility for any losses incurred by you or third parties arising from the use of these circuits, software, or information.
5. When exporting the products or technology described in this document, you should comply with the applicable export control laws and regulations and follow the procedures required by such laws and regulations. You should not use Renesas Electronics products or the technology described in this document for any purpose relating to military applications or use by the military, including but not limited to the development of weapons of mass destruction. Renesas Electronics products and technology may not be used for or incorporated into any products or systems whose manufacture, use, or sale is prohibited under any applicable domestic or foreign laws or regulations.
6. Renesas Electronics has used reasonable care in preparing the information included in this document, but Renesas Electronics does not warrant that such information is error free. Renesas Electronics assumes no liability whatsoever for any damages incurred by you resulting from errors in or omissions from the information included herein.
7. Renesas Electronics products are classified according to the following three quality grades: "Standard", "High Quality", and "Specific". The recommended applications for each Renesas Electronics product depends on the product's quality grade, as indicated below. You must check the quality grade of each Renesas Electronics product before using it in a particular application. You may not use any Renesas Electronics product for any application categorized as "Specific" without the prior written consent of Renesas Electronics. Further, you may not use any Renesas Electronics product for any application for which it is not intended without the prior written consent of Renesas Electronics. Renesas Electronics shall not be in any way liable for any damages or losses incurred by you or third parties arising from the use of any Renesas Electronics product for an application categorized as "Specific" or for which the product is not intended where you have failed to obtain the prior written consent of Renesas Electronics. The quality grade of each Renesas Electronics product is "Standard" unless otherwise expressly specified in a Renesas Electronics data sheets or data books, etc.

   "Standard": Computers; office equipment; communications equipment; test and measurement equipment; audio and visual equipment; home electronic appliances; machine tools; personal electronic equipment; and industrial robots.

   "High Quality": Transportation equipment (automobiles, trains, ships, etc.); traffic control systems; anti-disaster systems; anti-crime systems; safety equipment; and medical equipment not specifically designed for life support.

   "Specific": Aircraft; aerospace equipment; submersible repeaters; nuclear reactor control systems; medical equipment or systems for life support (e.g. artificial life support devices or systems), surgical implantations, or healthcare intervention (e.g. excision, etc.), and any other applications or purposes that pose a direct threat to human life.
8. You should use the Renesas Electronics products described in this document within the range specified by Renesas Electronics, especially with respect to the maximum rating, operating supply voltage range, movement power voltage range, heat radiation characteristics, installation and other product characteristics. Renesas Electronics shall have no liability for malfunctions or damages arising out of the use of Renesas Electronics products beyond such specified ranges.
9. Although Renesas Electronics endeavors to improve the quality and reliability of its products, semiconductor products have specific characteristics such as the occurrence of failure at a certain rate and malfunctions under certain use conditions. Further, Renesas Electronics products are not subject to radiation resistance design. Please be sure to implement safety measures to guard them against the possibility of physical injury, and injury or damage caused by fire in the event of the failure of a Renesas Electronics product, such as safety design for hardware and software including but not limited to redundancy, fire control and malfunction prevention, appropriate treatment for aging degradation or any other appropriate measures. Because the evaluation of microcomputer software alone is very difficult, please evaluate the safety of the final products or system manufactured by you.
10. Please contact a Renesas Electronics sales office for details as to environmental matters such as the environmental compatibility of each Renesas Electronics product. Please use Renesas Electronics products in compliance with all applicable laws and regulations that regulate the inclusion or use of controlled substances, including without limitation, the EU RoHS Directive. Renesas Electronics assumes no liability for damages or losses occurring as a result of your noncompliance with applicable laws and regulations.
11. This document may not be reproduced or duplicated, in any form, in whole or in part, without prior written consent of Renesas Electronics.
12. Please contact a Renesas Electronics sales office if you have any questions regarding the information contained in this document or Renesas Electronics products, or if you have any other inquiries.

(Note 1) "Renesas Electronics" as used in this document means Renesas Electronics Corporation and also includes its majority-owned subsidiaries.

(Note 2) "Renesas Electronics product(s)" means any product developed or manufactured by or for Renesas Electronics.

M6270X, M6271X, M6272X, M6273X, M6274XML/SL

Voltage Detecting, System Resetting IC Series

REJ03D0525–0200
Rev.2.00
Nov 03, 2005

Description

The M627XXML/SL is a voltage threshold detector designed for detection of a supply voltage and generation of a system reset pulse for almost all logic circuits such as microprocessor.

It also has extensive applications including battery checking, level detecting and waveform shaping circuits.

Features

- Detecting voltage
  - M627X2, M627X3: 2.87V
  - M627X4, M627X5: 2.58V
  - M627X6, M627X7: 2.39V
  - M627X8, M627X9: 1.72V
- Hysterisis voltage 80mV
- Delay time
  - M6270X: 0sec
  - M6271X: 200usec
  - M6272X: 50msec
  - M6273X: 100msec
  - M6274X: 200msec
- Few external parts
- Low threshold operating voltage
  (Supply voltage to keep low-state at low supply voltage) 0.65V (Typ.) at R_L=22kΩ
- Wide supply voltage range 1.5V to 7.0V
- Extra small 3-pin package (3-pin FLAT)
- Built-in long delay time

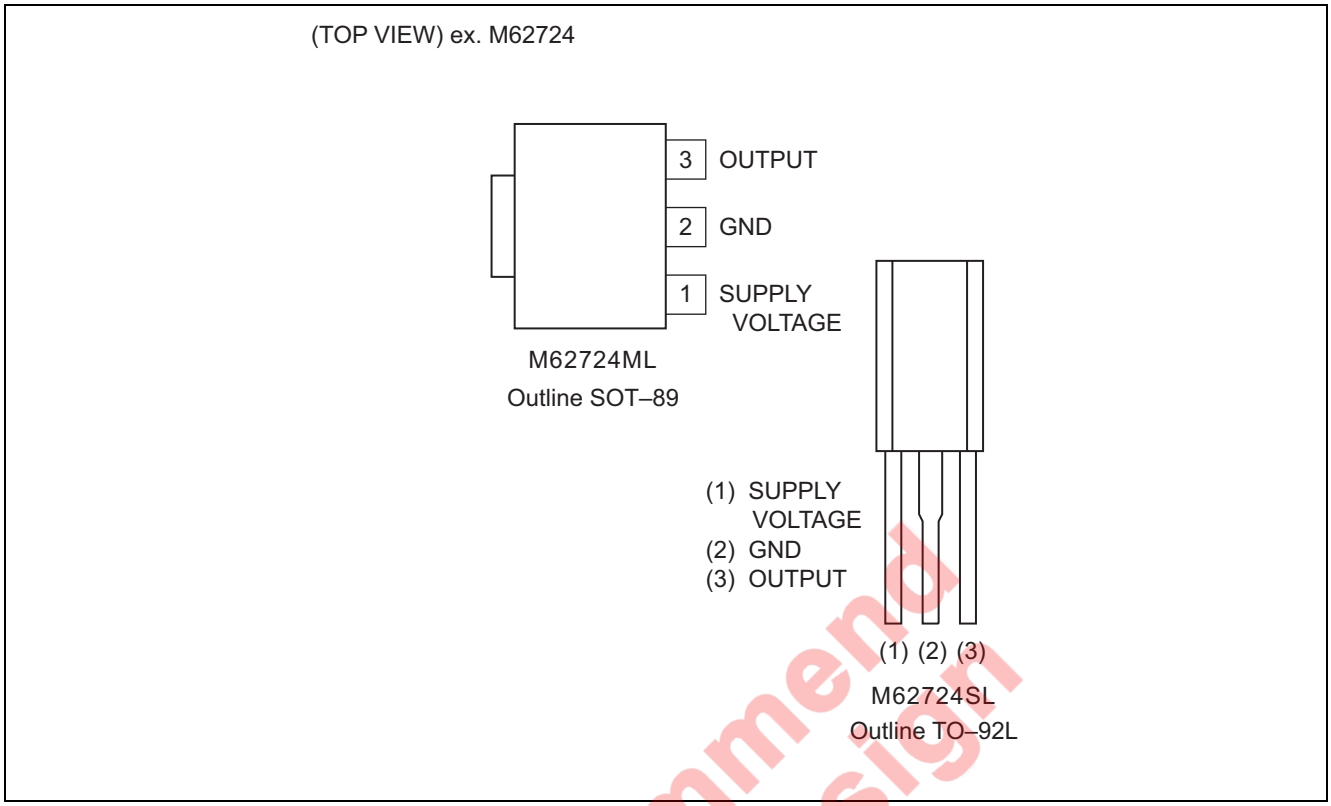
Application

- Reset pulse generation for almost all logic circuits
- Battery checking, level detecting, waveform shaping circuits
- Delayed waveform generator
- Switching circuit to a back-up power supply
- DC/DC converter
- Over voltage protection circuit

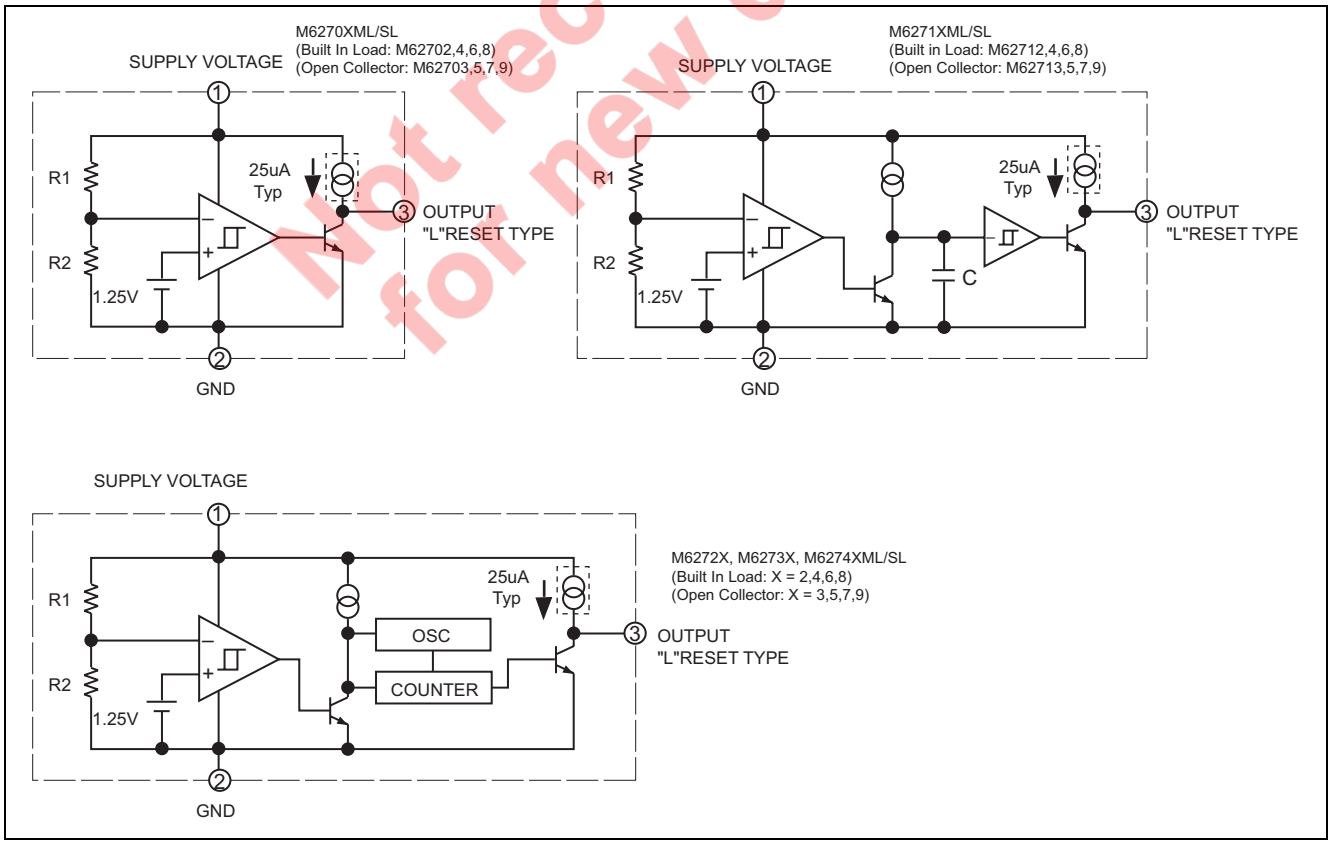
Recommended Operating Condition

- Supply voltage range 1.5V to 7.0V

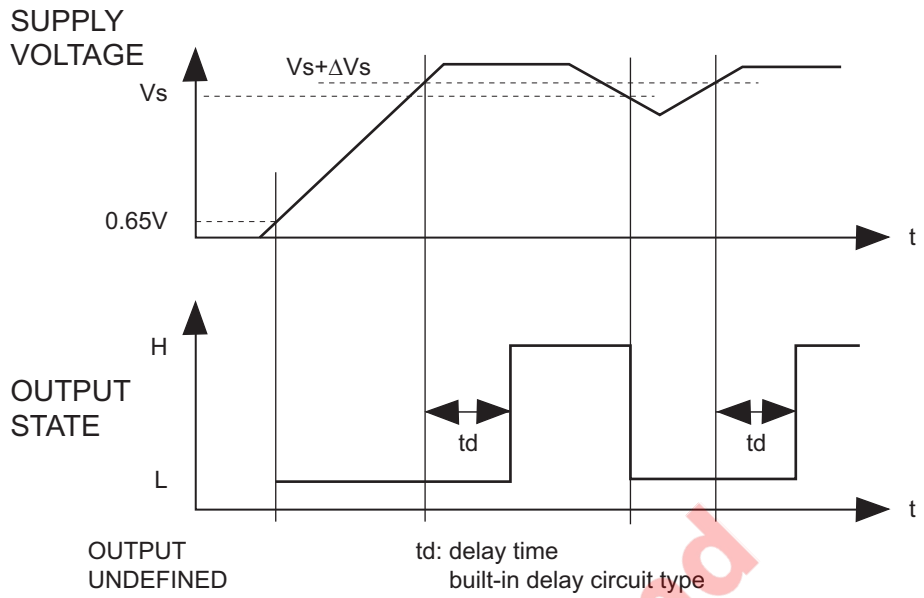
Pin Arrangement



Block Diagram



Function Diagram



Output Form

Built-in Load	Open Collector
M627X2	M627X3
M627X4	M627X5
M627X6	M627X7
M627X8	M627X9

Absolute Maximum Ratings

(Ta = 25°C, unless otherwise noted)

Item	Symbol	Ratings	Unit	Test Conditions	
Supply voltage	V_{CC}	7	V		
Output sink current	I_{sink}	6	mA		
Output voltage	V_O	V_{CC}	V	Output with constant current load	
Power dissipation	Pd	700	mW	3pin SIP	
		500		3pin FLAT	
Thermal derating	K_θ	7	mW/°C	Ta ≥ 25°C	3pin SIP
		5			3pin FLAT
Operating temperature	T_{opr}	–30 to +85	°C		
Storage temperature	T_{stg}	–40 to +125	°C		

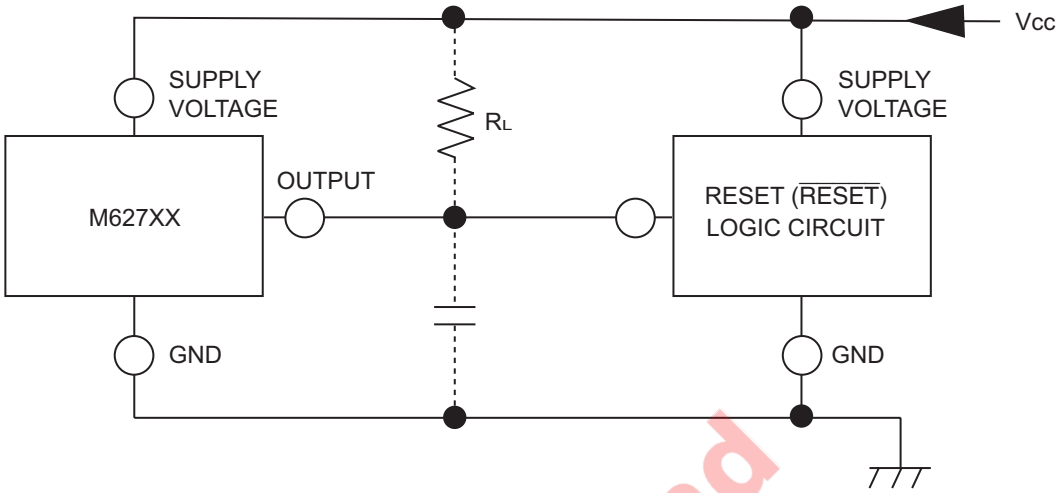
Electrical Characteristics

(Ta = 25°C, unless otherwise noted)

Item	Symbol	Min	Typ	Max	Unit	Test condition		
Detecting voltage	V_S	2.74	2.87	3.00	V	M627X2, 3		
		2.46	2.58	2.70		M627X4, 5		
		2.28	2.39	2.50		M627X6, 7		
		1.64	1.72	1.80		M627X8, 9		
Hysteresis voltage	ΔV_S	50	80	110	mV			
Detecting voltage temperature coefficient	$V_S/\Delta T$	—	0.01	—	%/°C			
Circuit current	I_{CC}	100	200	340	µA	No OSC & counter		M6270X
		120	220	400				M6271X
		250	395	560		Built-in OSC & counter X=2,3,4	V_{CC}=3.3V	M627X2
		225	370	535				M627X3
		230	375	540			V_{CC}=3.0V	M627X4
		205	350	515				M627X5
		200	345	510			V_{CC}=2.7V	M627X6
		175	320	485				M627X7
		130	275	440			V_{CC}=2.0V	M627X8
		105	250	415				M627X9
Delay time	tpd	—	3	—	µs	Response Time		M6270X
		80	200	500	ms	Ta=–30 to +85°C		M6271X
		30	50	70				M6272X
		60	100	140				M6273X
		120	200	280				M6274X
Output saturation voltage	Vsat	—	0.2	0.4	V	V_{CC}=2V, I_{sink}=4mA, M627X8,9: V_{CC}=1.6V		
Threshold operating voltage	V_{OPL}	—	0.7	0.8	V	Minimum supply voltage for operation	R_L=2.2kΩ, Vsat≤0.4V	
		—	0.6	0.7			R_L=100kΩ, Vsat≤0.4V	
Output load current	I_{OC}	–40	–25	–17	µA	Built-in Load type, V_O=1/2*V_{CC}		
Output high voltage	V_{OH}	V_{CC}–0.2	V_{CC}–0.06	—	V	Built-in Load type		
Output leak current	I_{OH}	—	—	30	nA	Open collector type		
		—	—	1	µA		Ta=–30 to +85°C	

Example of Application Circuit

Reset Circuit of M627XX Series



Note: 1. The logic circuit preferably should not have a pull-down resistor, but if one is present, add load resistor RL to overcome the pull-down resistor.
